

COMPANY PROFILE

Spenza Group of companies has made it a tradition of Introducing Revolutionary Innovations. Since the start of the group's manufacturing activities, we have been leaders in innovations.

We are adding one more Spenza CONCEPT for the world to behold. We are proud to introduce to the ceramic world, the revolution called DIGITAL PRINTING. We have made all the technological as well as design and Development exercises and are ready to storm the markets with these mind boggling new products.

For details, Digital Printing Technology in ceramic tiles enables us to print anything and every thing onto the tiles with Unlimited & Everlasting Colours. Feel Effect with Punches, Grooves & Tappers. Unlike the limitation of same design on a number of tiles. With this technology, your logo or your photos can be printed onto the tiles.

Whatever you or your designer can image, Spenza can now deliver. We have made advancements in the technology to such a level that we can boast to be the real leader in Customer Satisfaction as well.

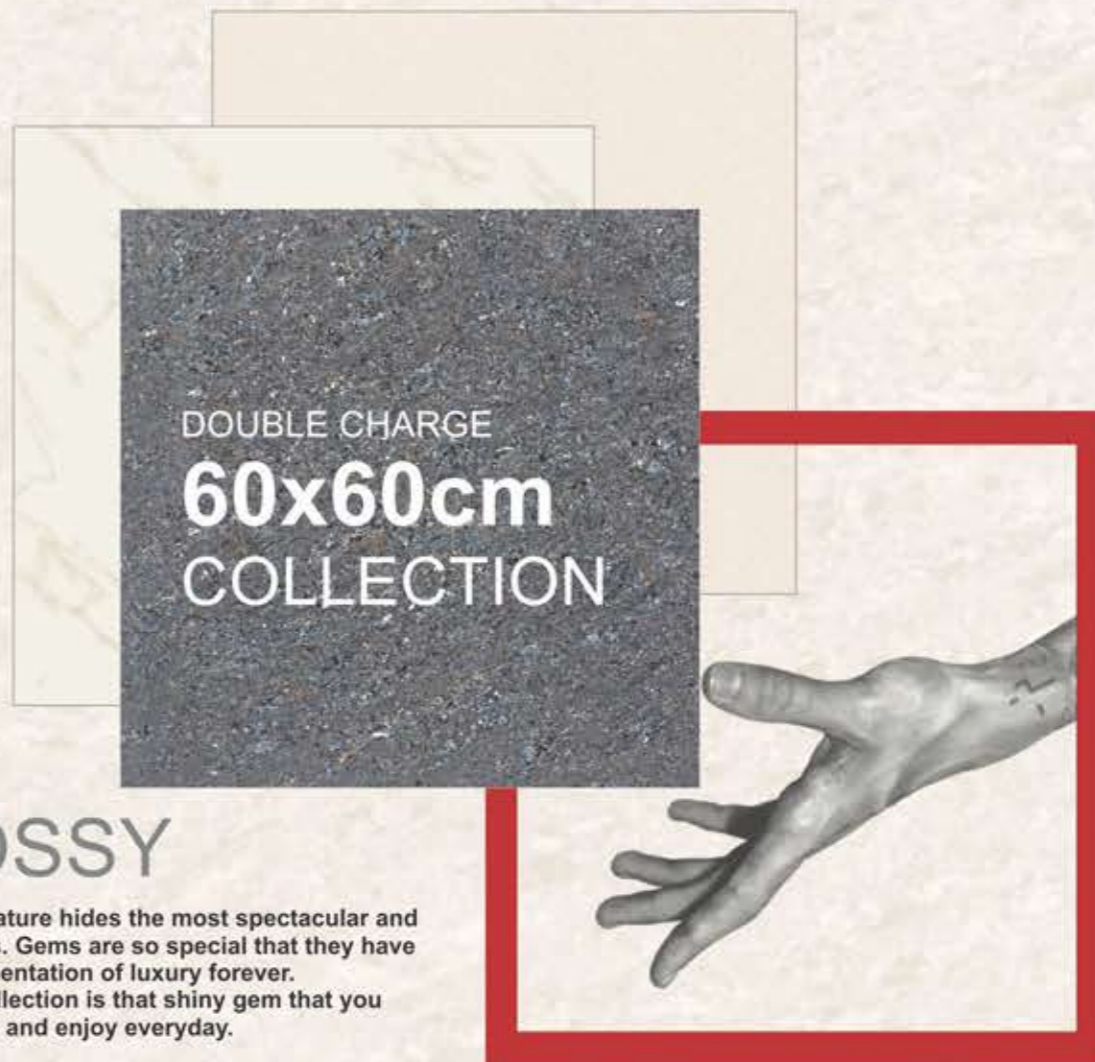

As our Channel Partners, Dealers, Distributors and Retailers, you can be elated to sell this great Digital Print Range to your customers. What you offer to them now can be made as exclusive to their desires.

Welcome to the Digital Ceramic World of Spenza Ceramic
